

Data science project 1 : EDA (Exploratory data analysis)

Title : Ukrain war analysis

In this project I have used pandas, & matplotlib to analyze Russian equipment losses in the ukrain war

Softwares used:

Python 3.10, pandas, matplotlib

Editors used : jupyter notebook

Steps in this project

- First I have collected russian equipment losses data from kaggle
 - I have loaded the data using pandas
 - I have cleaned the data by finding empty rows and filling with meaningful values with the help of fillna() function
 - I have analyzed the data by using matplotlib lib plot pictorial representation.
-
